WHAT TO DO FOR THE CHIGGER BITE

Note to Germany and Fate of Mexicans is Secondary.

STULIWATER, ORDS. July 22-The Wilson note to Germany and the ome matters of secondary interest broughout Oklahoma and neighbor-ng states the festive little chigger

We people in this locality are pes tered almost beyond endurance with that almostly little rate, the chigger, Little ones are literally covered with

"The remedies for the prevention of chiggers can be applied in practical ways in such be abilied as houseyards, out I don't consider that the rem-

ways and blades with flower of sal-paur. The same freatment is advis-sible for lawns where a person desires to rest be east the shade of trees or to lounge about in the open.

The sulphur can be easily jostled through the meshes of a cheesecloth-lack and enough should be applied to give soler to the plants. In woodlands and plante grounds there is no better method of eradicating chaggers than making my with sheep, since it seems naturage with sheep, since it seems hat they assend the legs of the sheep ad are killed by country in contact outh the position oil of the wool. The cost of applying suinbur will

The cost of applying stinbur will be about one deliar to two deliars per circ, since about fifty pounds are remired for each acre.

It is also interesting to know benething of the life history of this accuracy peal. The female lays her ags on the surface of the soil or in cass on the surface of the soil or in the cracks and crevices of the ground to the number of about four hundred in a place. In becoming mature, it levelups to a marked extent on other numbers. It also feeds on the human form to a marked extent. Being pre-duceous in habit, it wanders about considerably on woods and grasses and when numerous becomes exceedingly when numerous becomes exceedingly scatiferous to persons frequenting such places. It develops especially on weeds and graces along streams or soils, the edges of murshes, or under

Remedies for Chigger Bites. "Bad results from infestation from higgers may be prevented if a bath staken in hot water or water containg sait or strong soap within an hour two after intestation begins. After is chiggers, however, have located temselves and have begun to inflame ie skin, a bath less little or no ef-

If it is necessary to become exposed to chiggers, the shoes and stockings should be thoroughly dusted with sulphur. This will aid largely in presenting attacks provided the vegetation is only a few inches high through which a person is to travel on foot.
